

## ON MISSION midweek study 1

In 2013 a cruise ship had to be turned around to rescue a French sailor who was on a life saving vessel. Feel free to read the details here.

You have to love the cruise ship captain. The ship captain made the decision to turn his cruise ship around, inconveniencing the cruise of thousands of travellers to travel 53 hours into bad weather to save a man's life. Interestingly there were a whole lot of cruisers who were deeply upset at that decision - they had paid for their cruise, and they wanted it- they were quite content to leave the SOS mission to some hypothetical other - and continue their cruise uninterrupted.

Can you believe that?
